

Kush Rajesh Shah

ServiceNow Developer

United States | 571-587-5328 | kushs2511@gmail.com | linkedin.com/in/kushshah1025 | [Portfolio](#) | [GitHub](#)

Technical Skills

- ServiceNow: REST APIs, Business Rules, Client Scripts, UI Policies, ACLs, Tables & Forms, Flow Designer, Workflows, Transform Maps, ITSM
- Languages: Python, Java, JavaScript, TypeScript
- Backend: Spring Boot, FastAPI, Node.js, REST APIs, JWT / RBAC
- AI & Automation: Claude API, LLM integration, AI agents, ETL pipelines, Prompt engineering
- Cloud & DevOps: AWS, Docker, Kubernetes, GitLab CI/CD, Jenkins, Terraform
- Databases & Tools: MongoDB, PostgreSQL, Redis, MySQL, Kafka, JUnit 5, Postman, Git, Jira

Education

Master of Science in Computer Science

George Mason University

Aug 2023 - May 2025

Fairfax, Virginia, USA

Relevant Experience

Accenture

Software Engineering – Application Development Associate

Aug 2021 – Aug 2023

Pune, Maharashtra, India

- Eliminated manual ITSM notification workflows by designing ServiceNow REST APIs to automate outbound alerts across 3+ business units, freeing a team of 10+ engineers from repetitive status updates and reducing response time by ~30%.
- Enforced dynamic field validation and streamlined data entry by building Client Scripts and UI Policies across 5+ custom ServiceNow Tables and Forms, reducing user input errors by ~40%.
- Strengthened platform security by developing Business Rules and ACLs to enforce role-based data access controls across 3+ ServiceNow applications, ensuring zero unauthorized access incidents during tenure.
- Reduced manual intervention in approval processes by ~50% by designing Flow Designer workflows to automate multi-step escalations across 4+ enterprise service operation teams.
- Achieved 99% ticket creation accuracy by building Transform Maps to auto-generate ServiceNow ITSM tickets from Excel data across 10+ data sources, replacing a fully manual triage process and improving SLA compliance.

Stateable

Software Engineer

Nov 2025 – Present

Remote, USA

- Eliminated manual insurance document processing by building an AI automation pipeline using Claude API, AI agents, and Python, achieving 80% straight-through processing for quotes and commissions.
- Built ETL pipelines and regex-based data cleaning into MongoDB, standardizing 100+ document types at 95% extraction accuracy and deploying via Docker and GitLab CI/CD.

WoMen of Connections Ministry Inc.

Technology and Software Development Intern

July 2025 – Nov 2025

Remote, USA

- Rebuilt a static platform into a dynamic full-stack application using ReactJS and Spring Boot REST APIs, cutting page load time by 30% and API latency by 20% for 20+ tested users.

Projects

AI-Powered IT Help Desk | ServiceNow, Flow Designer, Business Rules, REST API, LLM

Jun 2026 – Present

- Eliminated manual IT incident triage by building a custom ServiceNow application that integrates an LLM via outbound REST API to auto-categorize incidents, suggest resolutions, and assign priority levels – reducing triage time by ~70%.
- Ensured role-appropriate access across employees, agents, and managers by designing Flow Designer workflows with ACL-based routing, automating ticket assignment to the correct group based on AI categorization.
- Reduced form errors and enforced consistent data capture by implementing Client Scripts and UI Policies for dynamic form behavior, and triggered automated ITSM notifications at each workflow stage via Business Rules.

Online Event Booking Platform | Java, Spring Boot, Redis, Kafka, JWT, Stripe, Spring AI

Jan 2026 – Feb 2026

- Eliminated overbooking under high concurrency and reduced DB queries by ~60% by building a Spring Boot microservices platform with MongoDB optimistic locking and Redis caching, integrating Stripe for automated payment processing.

Certifications

- Certified Application Developer (CAD), ServiceNow
- Certified System Administrator (CSA), ServiceNow
- Microsoft Azure AI Fundamentals (AI-900), Microsoft Power Platform Fundamentals (PL-900), Microsoft
