

Kush Rajesh Shah

Software Engineer

United States | 571-587-5328 | kushs2511@gmail.com | linkedin.com/in/kushshah1025 | [Portfolio](#) | [GitHub](#)

Technical Skills

- Languages: Python, Java, JavaScript, TypeScript
- Backend: Spring Boot, Spring Security, Hibernate, REST APIs, GraphQL, JWT / RBAC, FastAPI, Node.js, Spring AI
- Databases & Distributed Systems: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Apache Kafka, Microservices
- Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, Terraform, CI/CD Pipelines
- Testing & Tools: JUnit 5, Mockito, Pytest, Postman, Git, Jira, ServiceNow
- Competencies: Data Structures & Algorithms, OOP Design, Agile Methodology, AI & Automation, SDLC

Education

Master of Science in Computer Science

George Mason University

Aug 2023 - May 2025

Fairfax, Virginia, USA

Experience

Stateable

Software Engineer

Nov 2025 – Present

Remote, USA

- Eliminated manual insurance document processing by building an end-to-end AI automation pipeline using Claude API, AI agents, and Python, achieving 80% straight-through processing for quotes and commissions.
- Solved unstructured data ingestion at scale by building ETL pipelines and regex-based data cleaning into MongoDB, standardizing 100+ document types at 95% extraction accuracy.
- Reduced deployment risk by containerizing services with Docker on AWS Lambda and automating releases via GitLab CI/CD, enabling zero manual intervention in production deployments.

WoMen of Connections Ministry Inc.

Technology and Software Development Intern

July 2025 – Nov 2025

Remote, USA

- Architected and implemented a full-stack application using ReactJS and Spring Boot REST APIs, resulting in a 30% reduction in page load speed and a 20% decrease in API latency for 20+ users.

Accenture

Software Engineering – Application Development Associate

Aug 2021 – Aug 2023

Pune, Maharashtra, India

- Eliminated manual client communication by designing ServiceNow REST APIs to automate outbound ITSM notifications across 3+ business units, reducing response delays by eliminating manual handoffs for a team of 10+ engineers.
- Automated SFTP file transfer workflows with programmatic ServiceNow ticket generation, reducing manual processing overhead across daily transfer cycles.
- Replaced error-prone manual data entry by building Transform Maps to auto-generate ServiceNow ITSM tickets from Excel data at 99% accuracy, improving SLA compliance.

Projects

Online Event Booking Platform | Java, Spring Boot, Redis, Kafka, JWT, Stripe, Spring AI

Jan 2026 – Feb 2026

- Built a high-concurrency event booking platform using Spring Boot microservices and MongoDB, eliminating overbooking via atomic operations and optimistic locking, reducing booking conflicts to zero under simulated load.
- Reduced DB queries by ~60% via Redis caching, ensured zero notification loss via Kafka async messaging, automated payments and refunds via Stripe, and secured APIs with JWT and Spring Security RBAC achieving ~80% test coverage.
- Delivered AI-powered features by integrating Spring AI with Groq LLaMA 3.3, enabling natural language event search, personalized recommendations, and automated event description generation.

Microservices Based Survey Management System | Java, Spring Boot, MySQL, Docker, AWS

Mar 2025 – Apr 2025

- Migrated a monolithic system to Spring Boot microservices, reducing deployment cycle time by 60% and deployment time by 70% via Docker, Kubernetes, and AWS CodePipeline CI/CD automation.

Movie Review Application | ReactJS, Java, Spring Boot, MongoDB

Jan 2025 – Feb 2025

- Designed and deployed a full-stack application utilizing ReactJS and Spring Boot REST APIs with MongoDB, improving user session engagement by 25% for movie exploration.

Certifications and Publications

- Microsoft Azure AI Fundamentals- AI-900, Microsoft Power Platform Fundamentals- PL-900 by Microsoft
- Certified Application Developer (CAD), ServiceNow
- Certified System Administrator (CSA), ServiceNow
