Experience

Stateable

Nov 2025 – Present

Junior Software Engineer

Remote, USA

- Built an AI-powered document processing pipeline using Claude, AI agents, and Python to automate insurance workflows.
- Implemented regex-based data cleaning and ETL pipelines, integrating MongoDB for structured storage of quotes and commissions.
- Deployed containerized services using Docker on AWS Lambda with GitLab CI/CD for automated builds and releases.

WoMen of Connections Ministry Inc.

July 2025 – Nov 2025

Technology and Software Development Intern

Remote, USA

- Designed and developed responsive web pages using ReactJS and HTML/CSS, improving load times by ~30% .
- Built Spring Boot REST APIs to enable dynamic content loading, improving data delivery speed by ~20%.
- Conducted usability testing with 20+ users and incorporated feedback to improve navigation clarity, increasing task completion rates by ~12%.

Accenture

Aug 2021 – Aug 2023

Software Engineering – Application Development Associate

Pune, Maharashtra, India

- Built and customized ServiceNow UI components and forms to support internal application workflows.
- Developed and integrated REST APIs within ServiceNow to automate outbound status and notification processes.
- Designed and optimized ServiceNow email templates and UI actions, improving communication efficiency by 25%.
- Participated in Agile ceremonies (stand-ups, sprint planning, reviews), delivering sprint goals with cross-functional teams.

Projects

Real-Time Cryptocurrency Price Tracker | TypeScript, Next.js, Playwright, TailwindCSS

Aug 2025 – Sep 2025

- Built a responsive UI using Next.js and TailwindCSS to display live cryptocurrency prices with clean, real-time updates.
- Extracted live price data from TradingView using Playwright browser automation in headed mode for transparency.
- Implemented event-driven, low-latency streaming logic in TypeScript with automatic reconnection and error handling.
- Added alphabetical ticker sorting, fallback handling, and resilience mechanisms to ensure real-time performance.

Movie Review Application | ReactJS, Java, Spring Boot, MongoDB

Mar 2025 – Apr 2025

- Built a responsive single-page application using ReactJS with component-based architecture and dynamic rendering.
- Developed RESTful APIs using Java Spring Boot to handle movie data, reviews, and user interactions.
- Integrated MongoDB for flexible storage of movie metadata and user reviews with efficient queries.
- Optimized state management and API communication, reducing page load time by 40% .

Microservices Based Survey Management System | Python, FastAPI, Vue.js, MySQL, AWS

Aug 2024 – Sep 2024

- Built RESTful microservices using FastAPI (Python) to manage surveys, responses, and user workflows.
- Developed an interactive UI with Vue.js for creating, distributing, and viewing surveys in real time.
- Designed relational schemas and integrated MySQL for secure storage and efficient querying of survey data.
- Containerized services using Docker, orchestrated with Kubernetes, and deployed on AWS with CI/CD pipelines enabling zero-downtime releases.

Certifications and Publications

- Microsoft Azure AI Fundamentals- AI-900, Microsoft Power Platform Fundamentals- PL-900 by Microsoft
- Certified Application Developer (CAD), ServiceNow
- Self-made Programming Language: Alfa, International Research Journal of Engineering and Technology (IRJET)
